

Tomorrow...

by Jim Miller

Tomorrow, when you rise...you will most likely:
shower, dress & get ready,
have a nice breakfast,
read the morning news,
head off to work,
start your daily routine...
& be on your way!

Believe it or not...some people in the world...face other daily routines.

Imagine women and daughters...in many developing countries;
tomorrow, they will rise...and will most definitely...
get dressed & head out,
picking up water containers;
they'll walk for miles,
on roads or paths,
come rain or shine,
tomorrow, and every day... just to get water.

Imagine their daily trek:
with old, worn shoes,
or maybe even barefoot,
with an unfilled stomach,
and maybe suffering sickness...
from drinking unclean water.

Each and every person...needs water every day.
We need water to...
wash ourselves & our clothes,
cook & clean our dishes,
and flush our stools;
But most of all...we drink clean water...to live and survive!

We get water by...turning on the faucet.
Without giving a thought...we turn it on.
And there it is...sparkling, fresh and clean!

Millions in our world...know no such thing.

They have to walk...to get their water.

Millions in our world...have to carry it...

in large, heavy containers...back home to families.

Millions in our world...don't have safe water.

Some suffer and die...from dangerous infections & diseases.

Millions in our world...don't have adequate sanitation.

Their own human waste...pollutes the very water...they rely & depend upon.

Must this go on?

These poor, impoverished people...are our sisters & brothers!

Must they continue to...walk daily for water?

Must they continue to...use water that's polluted?

Must they continue suffering...from water-borne diseases?

Did you know we...can help end this?

The Bible invites us...to offer a cup...of water to them.

This simple endeavor can...change their lives forever!

A deep water well...can change their lives...

can change their world...

can change their future...

can bring them health...

and give them hope!

Imagine this new life:

-walking only steps to... their own community well!

-pumping up sparkling, safe...clean and refreshing water!

-safe water for cooking...cleaning, hygiene and sanitation!

-enough water for livestock...and for irrigating crops!

And those young girls...can attend school instead...of walking for water!

Are you ready to...help change their world?

Are you willing to...help enrich many lives?

“Water For Life Haiti”...is there to help!

They're drilling deep wells...for our sisters & brothers!

Why not help them...& help change their lives?

Tomorrow...bring new life! Tomorrow...provide clean water!

Dear Leon + Joy

Greetings in Christ Jesus, our Savior!

Enclosed is a reading I was inspired to write one morning. I enclosed a copy of it with the letters I wrote to family and friends.

I'm also enclosing \$10 for the book by Willis Miller.

I'll be calling again soon
as of today, we are over \$3,000.00!

Jim Miller
