April 2015

Greetings in Jesus' Name to all you wonderful friends who have been so faithful in helping the people of Haiti with clean water!!!

I keep being reminded of how we are all a part of the team that is doing the good work of helping other people. In looking at the body of Christ we all have different functions; we all need each other; that is why we all need to show God's love, to love our neighbors, whoever that may be. Remember the story in Luke 10 about the Good Samaritan?

The "expert" in the law asked Jesus, "Who is my neighbor?" after he'd recited what he must do to inherit eternal life—love God

first, and his neighbor as himself. At the end of the story, Jesus asked him, "Which of these three [passers-by] was neighbor to him who'd fallen into the hands of robbers?" The expert in the law replied, "The one who had mercy on him." Jesus told him, "Go and do likewise."

As you give to help the people of Haiti you are showing love to your neighbors in this world, even though you are not able to see those receiving that gift.

We have started to go into areas we either have already drilled or will soon commence

to drill some wells to do mobile medical clinics, so we can demonstrate God's love both with water and health care. The people are always so thankful that we've come, and we are thankful we can be your hands and feet as you make it possible for the people to receive help. We thank God for each of you.

Our WFL board was here recently, and they visited the place where our volunteers were doing a mobile medical clinic; it was

Waiting on the doctor, at our mobile medical clinic in Camp Perrin.

really something to see how the team was showing the love of God to the people with a smile, a tract, medicine and glasses if they were needed. When Dr. Winnie did a consultation for one of the pregnant ladies,

she was trying to find a fetal heartbeat, but the sad part was the baby had died. The woman had very high blood pressure and no prenatal care. Her husband was with her, fortunately, at this sad moment; some of the team members gathered around her and prayed for them before they left for a hospital to receive further care. It was a good time to be with the people and share the love of God.

One of the things that happened while the board was here was that we had a moment of dedication for the compound, with many of our employees and staff

participating and then enjoying a meal together with the board members. It was a good reminder to us all that it takes each one of us all together to make one team, for God's glory. We wish it would have been possible that each of you could have been present too, as an important part of the team!

Now one of our staff will be leaving, returning to New York State; we will miss him a LOT. Daryl Musser

has been our mechanic for the past year and a half and has done an awesome job. We thank him for the time he has given to help us. Daryl, we wish you well and pray God will abundantly bless you as you continue to pursue Him.

In the well-drilling realm, last month Ivan, Kenlin, and Nicolson were in a community close by, drilling; the hole was 132 feet deep; the guys got the well casing put in, then Ivan started to pump the well as usual, and the water really started coming, lot of water. He shut the compressor off, and the water just kept coming! It was an artesian well; we estimate it flows at the rate of 500-600 gpm. Fortunately close by was a ditch they were able to guide the water to so it wouldn't run into the houses that were very close by! The next day we poured cement down the outside so it would be a sanitary well. Now we have plans to make a "fountain" so multiple people can come fill their buckets at the same time—in seconds. People

come to get water to wash

clothes, bathe, cook, and drink. It is a wonderful blessing to them all. Earlier the same day of around 130' they hit water, set casing, and pumped the well, only to find out it also was an artesian one, flowing at 7 gallons per minute! So two artesian wells in one day was a celebration for the people!

Wishing Daryl Musser God's blessings as he returns to the States to live.

Some of you already know that Troy is now a married man; he got married January 24 to Vilna Jean. They live in a town not too far away from here, and he continues to drill with us. Congratulations, Troy and Vilna!!! God bless you abundantly!!

We want to thank all you people that came down this winter; you helped with so many things—from fixing up our shop and finishing our house to putting a roof on a church in the mountains a couple hours away from here. Thank you so much. And thanks to all

Congratulations, Troy and Vilna, on your recent marriage!!!

of you who've donated money and many articles!! We pray the Lord will keep on blessing you as you bless others. Please keep us in your prayers as we look for another mechanic and also a driller's helper. We know God is faithful, so we watch and pray. Let's stay in touch!
